

# Virtuweld™ Technology.

**Security without the cost.**

**Virtuweld looks like a machine welded clamshell, but is closed by hand.**

- Secure, undetectable seal
- Visually appealing with unique “stitched” appearance
- Economically hand-sealed for lower production cost
- Allows for quick response during peak demand without capital expense
- Available in stock molds or customized to your own specifications
- Available in post-consumer recycled plastics

First Choice Packaging is the exclusive North American manufacturer of Virtuweld, a simple, patented, manual closure that gives blister packs added security—without added costs.

*First Choice Packaging is the exclusive North American manufacturer of Virtuweld.*

*Embossed stitching gives the appearance of a welded seal.*

## Custom Cavities

We can use one of our standard platforms and create a custom cavity to fit your product. This allows us to create custom packaging for you that is quick to produce and very cost effective.

The FCP Virtuweld process:

1. Choose the size of platform that best suits your product or send us your product and we will recommend a suitable size and give you a quote.
2. We will make a prototype to the agreed specification for you to do mock-ups, presentations or make any necessary changes.
3. We will produce a set of top quality aluminum inserts to your final specification to fit within one of our standard platform sizes.

*Boosts your brand identity.*
